

Enhancing Arizona's Parent Networks (EAPN)

Is your child between 12 & 22?

Please take the following survey for parents of children with disabilities

National Family Support Survey

If you are the parent or primary caregiver of a young person with a disability between 12 and 22 years old, you are invited to be in a national research study. Please consider participating in an online survey regarding supports for families of youth with disabilities sponsored by Family Advocacy and Support Training (FAST).

A link to the survey appears at the bottom of this email.

Your answers to the questions on the National Family Support Survey are confidential and will help the Administration on Developmental Disabilities, parent centers, and researchers understand the information and supports families need to prepare for moving into adulthood. The information you share is extremely valuable and may help to inform program development for youth with disabilities in the future.

The [Family Advocacy and Support Training \(FAST\) Project](#) is funded by the Administration on Developmental Disabilities (ADD) as a Project of National Significance. FAST is a project of PACER Center in Minnesota in collaboration with Parent Centers throughout the United States and Territories and with the help of the University of Minnesota.

We encourage you to participate and greatly appreciate your time. To begin the survey, click on this link: <http://rtc.umn.edu/fast/main/index.asp>
